DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

I. Claims 1-5, drawn to a system for measuring low concentrations of stable and radioisotopes and/or low abundance isotopes, the system comprising a spectrometer assembly comprising a multi-slit assembly, a coincidence laser spectrometer coupled to the spectrometer assembly comprising an optical detector coupled to the multi-slit assembly for specific detection of transmitted ions, a voltage programmer flight tube coupled to the optical detector, the voltage programmer flight tube including a non-specific ion detector configured for the non-specific counting of transmitted ions, the flight tube further including an exit port at a first end thereof and a laser system at a second end thereof, and a charged beam steering optics assembly positioned proximate the exit port of the flight tube, classified in class 250, subclass 281.

II. Claims 6-39, drawn to an instrument comprising an inductively coupled plasma source mass spectrometer equipped with a multi-dimensional detector system wherein ions transmitted by the mass spectrometer are detected with high selectivity, classified in class 250, subclass 281.

Inventions I-II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions are not disclosed as capable of use together, they have different modes of operation, different functions, and different effects.

Art Unit: 2881

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
